2. One significant change from pre-World War II Warsaw was noted in the aerial photograph (b) [redacted]. This photo shows that the old "Kierbedzis" Bridge across the Vistula, which had been completely destroyed during the war, had not been rebuilt. This bridge connected Nowy Zjazd with Zygmuntowska Streets [redacted]. Rather than rebuild the old bridge, a new one was built across the Vistula connecting Korowna and Brukowa Streets [redacted]. This bridge across the Vistula had been planned during the 30's and is shown as a main East-West thoroughfare [redacted].
- In order to make this proposed thoroughfare a reality it would be necessary to either provide a tunnel or a deep cut to negotiate the steep west bank of the river at this point.
